## Plant List and Pruning Guidelines

### from Maps as of 01/01/24

- A - Annuals      B - Bulbs
- E - Evergreens   G - Grasses
- H - Herbs        P - Perennials
- R - Roses        S - Shrubs      T - Trees

TBP - To Be Purchased

#### Bloom Wood

1. Flowers are produced on new (current season's) wood
2. Flowers are produced on wood from past season; pruning before bloom will eliminate flowers
3. Blooms on old & new wood

**NOTE for BG:** Month activity delayed - wait to see if the caterpillars come out before removing the foliage. However, the grasses need to be cut back before they start showing growth; cut the grass and leave in the garden in case of existing egg cases.

#### Bloom Time

4. Prune after flowering if needed
6. Mid-season sheer if formal hedge is desired
8. Fall/early winter cut to ground
10. Wait until new growth appears before pruning
12. **Ask First!** Seldom requires pruning to control size

**DDD** means prune for Dead, Dying, Damaged - should be done at any time as needed

#### Pruning Guidelines - Shrubs & Trees

5. **Thinning Out Pruning** - select the oldest, woodiest stems in the shrub and completely remove to the ground. Remove no more than 1/4 to 1/3 of the total number of the branches in the shrub each year
7. Do not cut into old wood (dead zone) that has no leaves or needles
9. **Cut Candles** (new growth) in half when needles are fully elongated - only when needed to control size
11. **Rejuvenate** plant by cutting to approx. 6 inches from soil level

#### Pruning Guidelines - Perennials & Grasses

- A. **Cut Back** to just above ground level in Designated Month
- B. Remove dead / dying foliage
- C. **Cut Back** to just above ground level after Peak Bloom
- D. Deadhead
- E. **Cut Back** to 12-inch height
- F. **Leave in Fall**; clean up in Spring

#### Perennials - Spring Clean-up Note:

If Code A or B in Feb. or March - For the beneficial insects to emerge, no clean up until consistent temps in the 50's; may need to delay clean-up into April.

13. **Shake** to remove dead needles & use strong hose to dislodge
15. **Head Back** to lower side branch or outward facing bud to reduce height

#### GARDEN GALLERY PLANT LIST - 2024

These are Guidelines: Timing may need to be moved forward or delayed depending on weather, temps & actual bloom times
