

# Garden Gallery Plant List and Pruning Guidelines from Maps as of 01/01/25

- A - Annuals**    **B - Bulbs**  
**E - Evergreens**    **G - Grasses**  
**H - Herbs**    **P - Perennials**  
**R - Roses**    **S - Shrubs**    **T - Trees**

**TBP - To Be Purchased**

**Bloom Wood**

1. Flowers are produced on new (current season's) wood
2. Flowers are produced on wood from past season; pruning before bloom will eliminate flowers
3. Blooms on old & new wood

**Bloom Time**

4. Prune after flowering if needed
6. Mid-season shear if formal hedge is desired
8. Fall/early winter cut to ground
10. Wait until new growth appears before pruning
12. **Ask First!** Seldom requires pruning to control size

**DDD** means prune for Dead, Dying, Damaged - should be done at any time as needed

**Pruning Guidelines - Shrubs & Trees**

5. **Thinning Out Pruning** - select the oldest, woodiest stems in the shrub and completely remove to the ground. Remove no more than 1/4 to 1/3 of the total number of the branches in the shrub each year
7. Do not cut into old wood (dead zone) that has no leaves or needles
9. **Cut Candles** (new growth) in half when needles are fully elongated - only when needed to control size
11. **Rejuvenate** plant by cutting to approx. 6 inches from soil level

**Pruning Guidelines - Perennials & Grasses**

- A. **Cut Back** to just above ground level in Designated Month
- B. Remove dead / dying foliage
- C. **Cut Back** to just above ground level after Peak Bloom
- D. Deadhead
- E. **Cut Back** to 12-inch height
- F. **Leave in Fall**; clean up in Spring

**Perennials - Spring Clean-up Note:**

If Code A or B in Feb. or March - For the beneficial insects to emerge, no clean up until consistent temps in the 50's; may need to delay clean-up into April.

13. **Shake** to remove dead needles & use strong hose to dislodge
15. **Head Back** to lower side branch or outward facing bud to reduce height

**GARDEN GALLERY PLANT LIST - 2025**

These are Guidelines: Timing may need to be moved forward or delayed depending on weather, temps & actual bloom times

A	17																				
A	18	S	1	Hydrangea quercifolia	'Snow Queen'	Oakleaf Hydrangea	2010		X								D				

All paniculatas bloom on new wood - prune to control size to approximately 3-foot diameter; sets buds Jun/Jul

Evaluate after bloom; if needed, prune after flowering -- expecting will continue to do aggressive pruning can be pruned in May and again in June

Remove winterkill and any wild shoots. Retain natural shape.

Blooms on new wood. Wait until new growth is visible; trim to live buds around 4-5'; remove any dead growth below that point

See Rose Care Sheet

Wait until new growth is visible; trim to live buds around 4-5'; remove all dead growth below that point

DDD; Deadhead in March

Bed	ITEM	Type	on Map	BOTANICAL NAME	VARIETY	COMMON NAME	Year Planted	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Legend	Notes
BG					Month activity delayed - wait to see if the caterpillars come out before removing the foliage. However, the grasses need to be cut back before they start showing growth; cut the grass and leave in the garden in case of existing egg cases.													Apply the last mulch by August then leave it alone until the spring. Leave a few areas of bare ground for late nesting bees. Collect seeds from plants you want to propagate. Divide and transplant spring blooming plants

**NOTE: Fall Pruning Guideline information is provided for specific plant care. Garden Gallery defers Fall clean-up in this garden section to provide overwintering habitat for beneficial insects.**
